

Medical System solutions

Edition 2009

Trust in established and safe processes

Your partner for system solutions

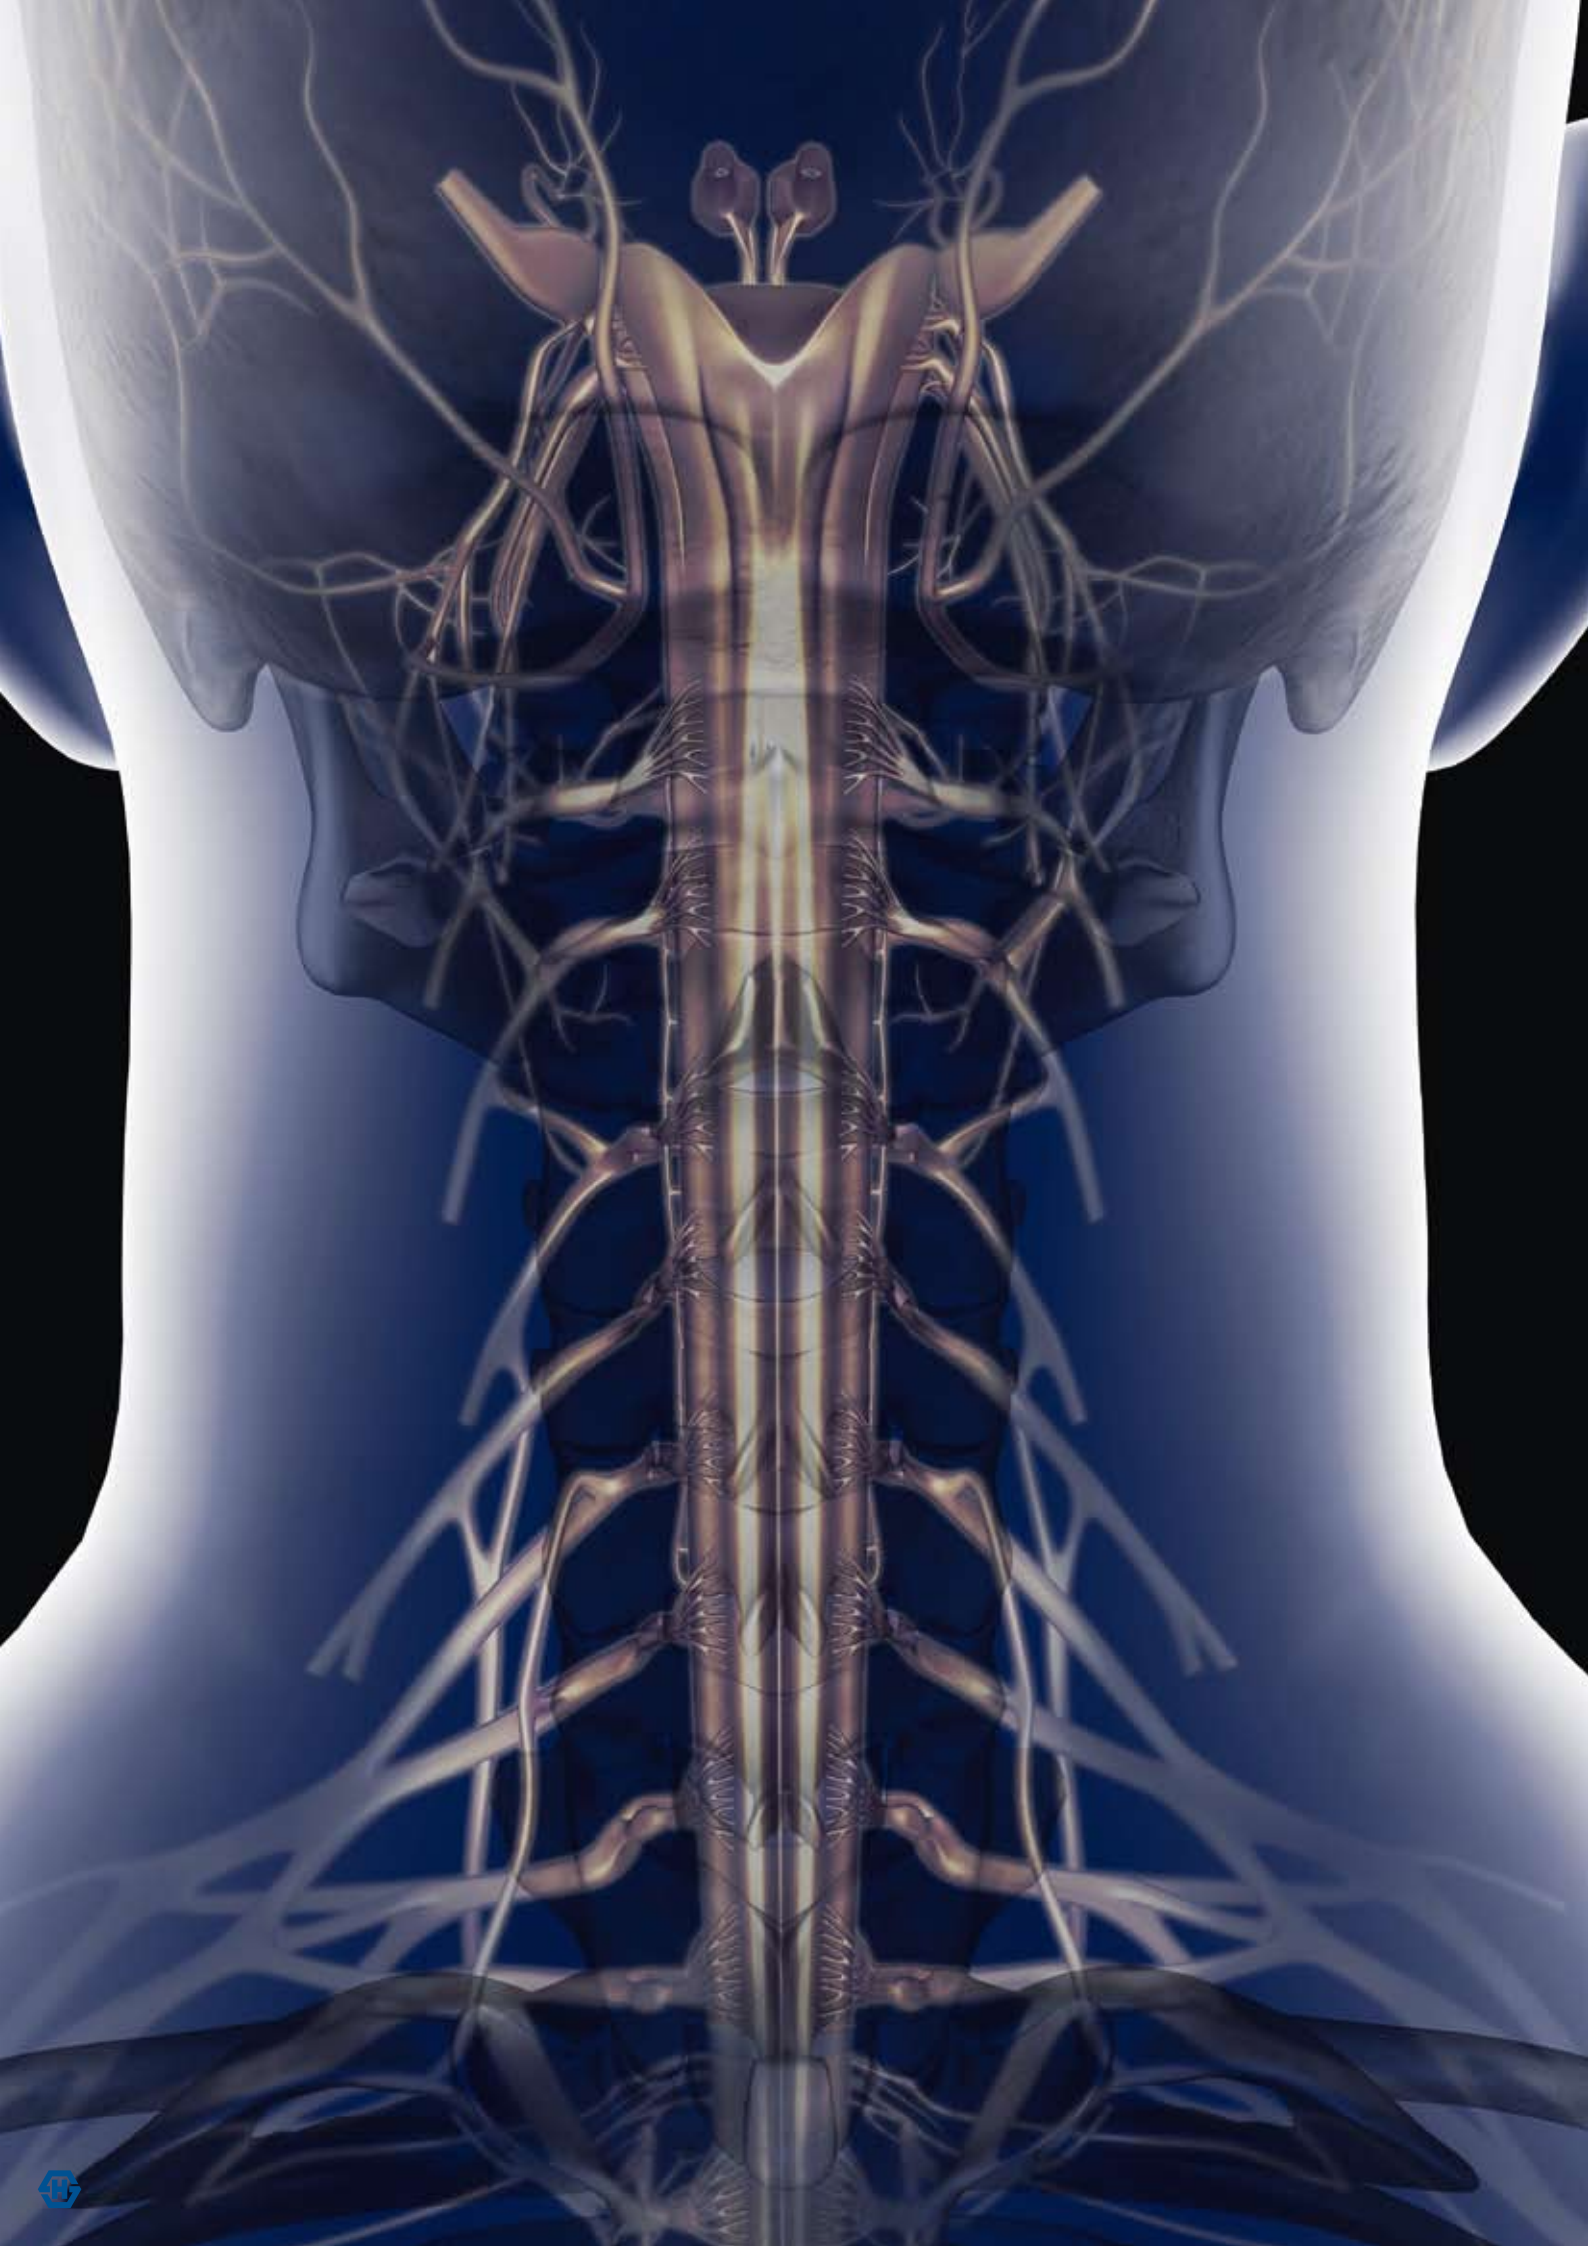

The HUBER+SUHNER Group is a leading global supplier of components and systems for electrical and optical connectivity. We offer technical expertise in radio frequency technology, fiber optics and low frequency technology under one roof, thus providing a unique basis for continual innovations focused on the needs of our customers all over the world.

Supplier for the medical market

HUBER+SUHNER provides the medical market with cables, connectors, assemblies, cable systems, antennas and accessories.

At the heart of our offering is a broad range of products that can be relied upon to meet high quality standards. Our products are backed up by flexible, dependable service and fast response times worldwide.

We concentrate on challenging applications and are able to respond by creating special product features and customer specific innovations.

Diagnostic Equipment

Three technologies

With three technologies under one roof - radio frequency, low frequency and fiber optics - HUBER+SUHNER offers both standard and customer specific solutions. We are able to combine and substitute our technologies with one another to meet present and future challenges.

HUBER+SUHNER first supports its customers with engineering on-site with its global application engineering staff. We then utilize our Research and Development staff and facilities in Switzerland to develop new products and perform testing and verification in our own laboratories. Finally, we setup product manufacturing in any of our own production facilities which are located around the world.

Typical products

Non magnetic RF connections, flexible and semi-flexible cable assemblies, customised harnesses.

«HUBER+SUHNER - in the name of quality»

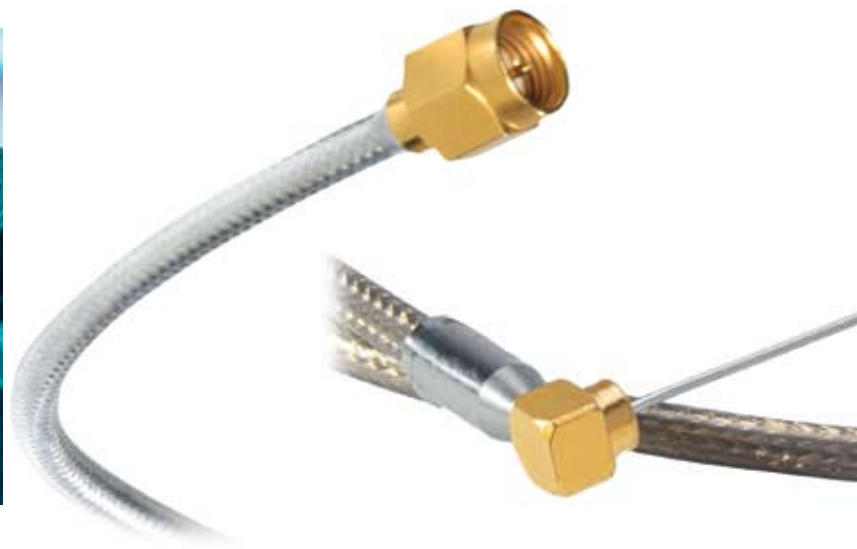

Minimal-invasive Solutions

Strong engineering expertise

With more than 50 years of experience in Radio Frequency, a current cable portfolio of more than 700 different coaxial cables, and thousands of RF connectors – HUBER+SUHNER is a strong partner for our customers working in emerging and critical medical applications.

Lowest loss combined with highest flexibility ensure that HUBER+SUHNER®*INVALINE* cables and RF connectors or transitions generate heat only where its needed. Strong engineering expertise also guarantees best performance and ergonomical design.

«More than 50 years of experience»

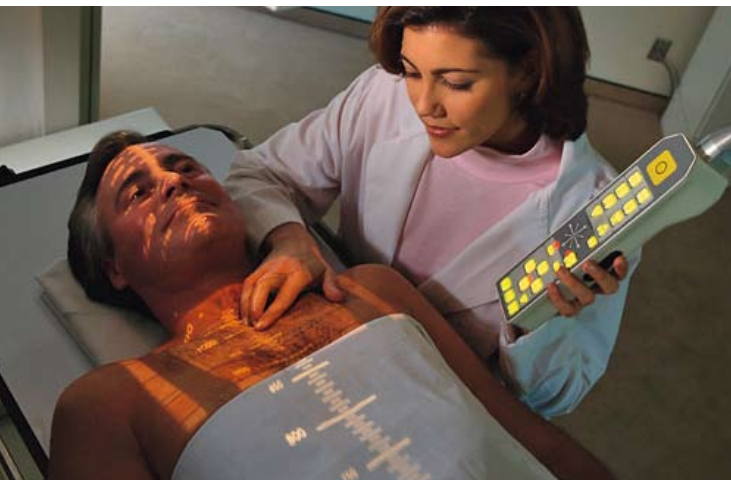

Radiation Therapy

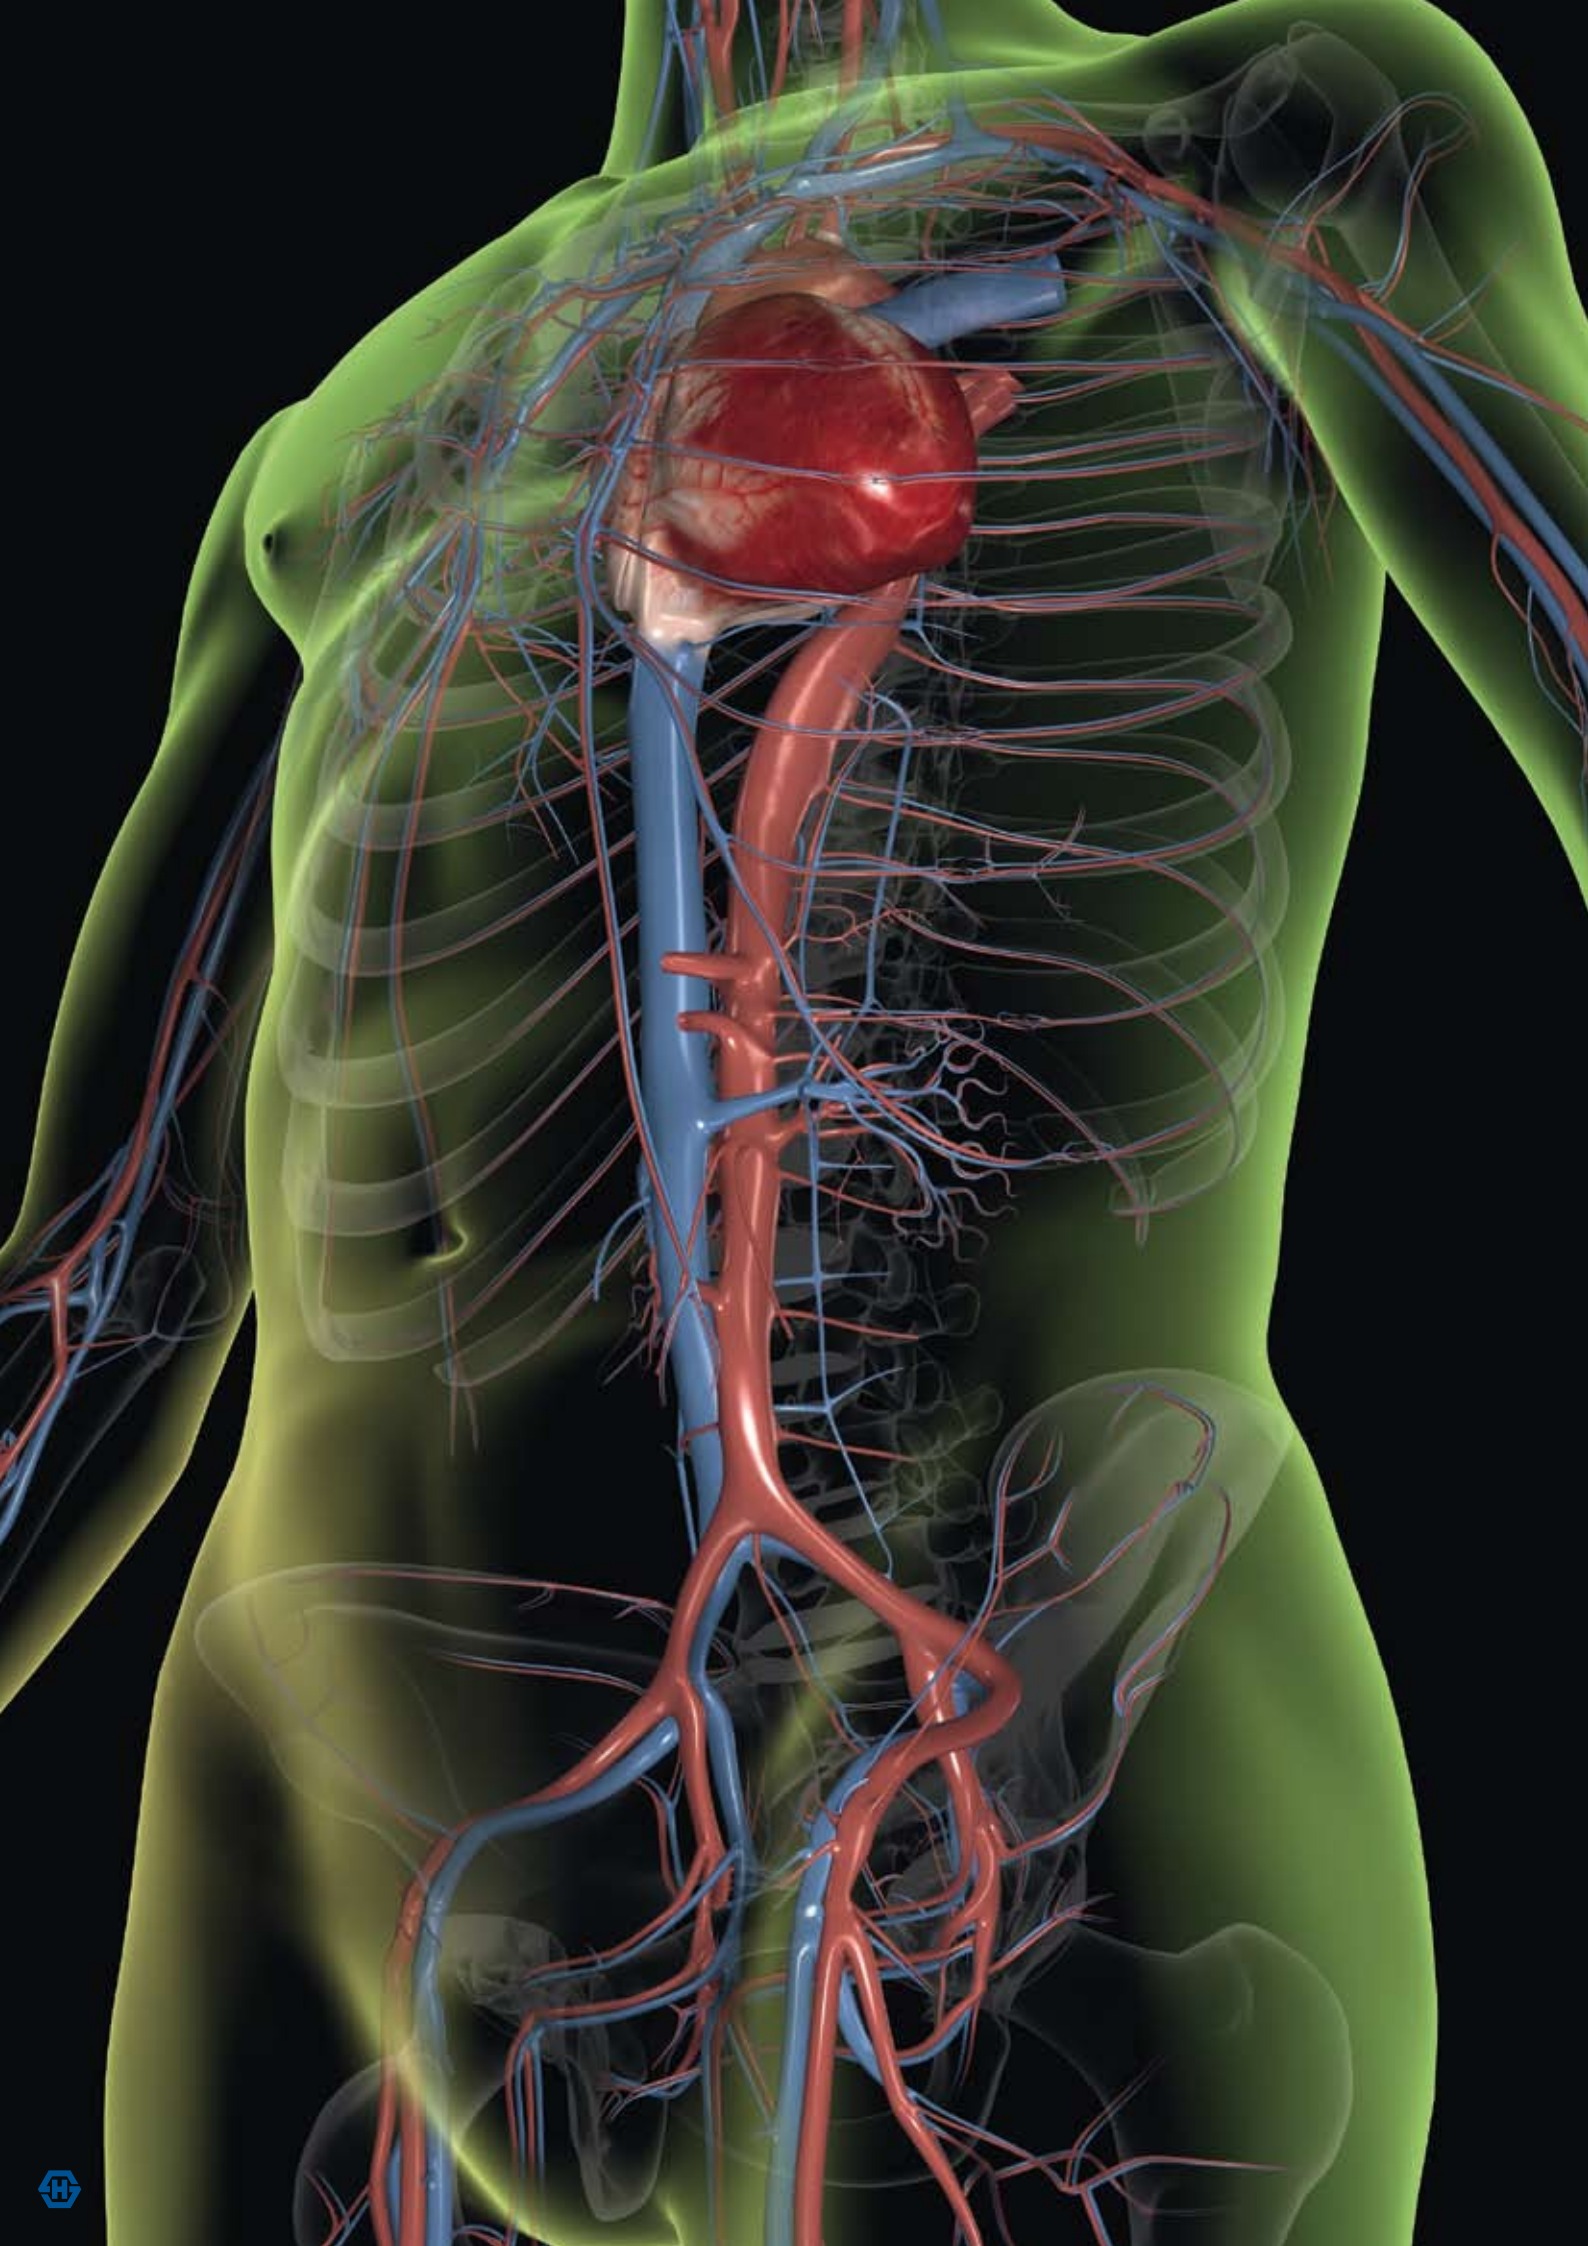

Broad product portfolio

For more than 20 years HUBER+SUHNER is a reliable partner for technology pioneers like PSI and CERN. For the build-up of their accelerators, we have developed and optimised a broad range of interconnect solutions based on the three technologies - high and low frequency and fiber optic.

With our onsite engineering support during design, planning and construction of new cyclotrons we add value through ideal electrical and optical performance and reduce the engineering efforts of our customers.

«Protect your investment with future-proof technology»

Patient Surveillance / Body Area Network

Smallest diameters

HUBER+SUHNER®MMBX, the floating board-to-board RF connection with smallest diameters, works for all known standards like Zigbee, W-LAN, Bluetooth, UWB, etc.

HUBER+SUHNER also offers customized antennas for hub as well as on sensor units - from first simulation to volume production.

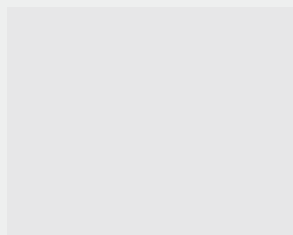

«HUBER+SUHNER – your partner to implement all wireless standards»

HUBER+SUHNER is certified according to
ISO 9001, ISO 14001, ISO/TS 16949 and IRIS.

WAIVER

It is exclusively in written agreements that we provide our customers with warrants and representations as to the technical specifications and/or the fitness for any particular purpose. The facts and figures contained herein are carefully compiled to the best of our knowledge, but they are intended for general informational purposes only.
