

Suspension clamp ECH12

Product Information

The suspension clamp ECH12 is developed for the Universal Cables of types EXCEL, FXCEL and AXCES™.

It is designed for safe, fast and easy pullout of the cable.

The Cable can easily be pulled out on the wheel positioned in the middle of the clamp. The Cable is then lowered by releasing the center bolt.

There is no need for lifting of the cable and no extra lifting tools are needed. The rubber insets are flexible and give low pressures on the cable. The clamp adapts itself to deviation angle of up to 45°.
